

I have been working as a OTR driver and I have changed channel so many times due to bad connection after a couple of miles. With XM radio I can safely listen to the channel i wish were ever I am in th US. Hearing the news and trafic/weather is very important and I want that to be available with XM. Therefore I respectfully urge FCC to reject the NAB's petition 04-160 and I want XM to be able an d give the service we on the road need.

Best Regards

Peter
